STRENGTH OF MISSOURI NEGROES

According to the report given out, Missouri can put into the field an army be whites and 41,441 Negroes, as against 420 Japanese, Chinese, Indians and others. Notwithstanding this relative war strength of the Negro and his intense loyalty to the flag, he could not begin to get the consideration from the state of Missouri that the Chinese, Japanese, Indians and others secure. The mission of The Broad Ax, is to awaken the sleeping Negro, to arouse the Indolent ones to inspire the honest ones, and to stop the frivolous and the depraved, from destroying those who might be saved.

The Negro should not forget this all important truth; that "Righteousness exalteth a nation, but sin is a reproach to any people." And this philosophy, "You can not change the principles of a reigning school in a day." And this, "The race is not given to the swift, neither to the strong; but to him that endure unto the end." Then since the race is no stronger than the individual characteristics, we should turn our attention to the training of our children, because the child is but the twig of the tree, if you scratch it, while it is tender or permit any one else to impede its growth, centuries to come will tell of it to our injury, remember that the children of today is the race of tomorrow, what a numerous responsibility.

THE EDWARDS BILL WOULD BAR ALL BUT DEMOCRATS

Measure Proposed by a Georgia Congressman to Legalize Segregation.

Washington.-Congressman Edwards of Georgia, author of a bill which has the civil service. He is said to have asserted on the floor of the house, while speaking in defense of his bill Feb. 24, that it was his desire to reorganize the civil service so that only white Democrats would be eligible to hold positions under the new system.

"There are many of us in the house who would like to see the civil service abolished," said Mr. Edwards. "Then we could not only get rid of the Negroes in the service, but we could put Democrats in. It seems, however, that the friends of the civil service are in the majority, and we are unable to get it abolished.

"My idea would be to abolish the present rotten system, and then rewrite another civil service statute after we had got Democrats and white people. In this way the Democrats would be covered under the new law and would hold on under it. It is politics, but our whole government system is one of politics and parties.

"We can't keep the parties strong unless we give the positions to those who help win victories. If putting the Republicans and Negroes out of jobs is the attitude of a spoilsman, then I am a spollsman to that extent. for I certainly have strong convictions along that line."

The Edwards bill provides that the executive heads of the several departments shall issue orders segregating the white and Negro employees in evand that hereafter "white clerks shall not be required to occupy the same offices or workrooms with employees or clerks of African blood or descent, nor shall any white clerk or employee be placed under the orders, direction of supervision of any person of African blood or descent."
